Amanda,

I think this clears up the confusion I was apparently having. For some reason I thought that if I filed the PCT it would mean that my US filing also gets delayed an additional 18 months along with it. I was viewing it as having to choose one or the other and didn't realize that the process for the US utility patent will move forward as it normally does and is completely independent of the PCT application. Is this correct?

I also did a little bit of research into other patents similar to mine. The attached pdf file is the result of this research.

~Matt
