PCT Patent Application

Applicant: Matthew Guertin

Serial No.: PCT/US2022/020919

Filed: March 18, 2022

For: Motorized rotatable treadmill and system for creating the illusion of movement

Our File: G185.0001WO1

Dear Matt:

Please find attached a copy of the Search Report and Written Opinion issued for the above-identified PCT application, along with references cited therein. No action needs to be taken at this point in the PCT application.

The Search Report and Written Opinion are non-binding. Each patent office that the application is filed in will conduct its own search independent of this report. The report is merely informational and depending on the art cited, the Applicant can amend their claims in the PCT application if they so choose (although, we admit, this is not common in my experience).

We do note that the Written Opinion does indicate that all of your claims are novel (that means new), although the Written Opinion indicates that some subject matter might be obvious by a combination of references (this is very common), there is subject matter in the claims as filed that the Written Opinion indicates is patentable. As noted above, the search conducted by the Examiner handling the U.S. application or other later filed application in another country may differ, but this is an encouraging indicator.

If you have any questions, feel free to let us know.

Please be advised that we will submit the Search Report and corresponding references to the U.S.

Patent Office in the pending U.S. application as is required by U.S. Patent Office rules on our duty of disclosure. Outside of this, no action is due at this time.

National phase applications will be due by **September 19, 2023**. We will remind you in advance of this due date.

Best regards,

Amanda
