GET the best setup for you

Let us know what kind of setup you have in mind, and we will help you choose the best solution for your specific needs.

[Build me a set-up](#)

Freelancer

Minimalistic and efficient setups (stationary or portable) suited for freelancers and small businesses in need of in-house yet professional photo shootings results, when tens to hundreds of items need to be photographed in a row.

Typical job: **Automated shooting**

Affordable solutions, adaptable to your creative ideas, without compromising the professional quality of your results. Efficient thanks to easy setup, automatic capturing, background removal and image processing, real-time backup and imagery export. Easy to repeat the previous (or similar) job with presets that include all settings for shooting and image-processing.

Fast delivery worldwide! You can choose self-installation and remote training (selected models) - or rely on the experienced PhotoRobot team.

Recommended setup:

[Case](#) | [Cube](#) | [Turntable](#) | [Centreless Table](#)

Recommended equipment:

PhotoRobot | Camera | Tripod | Lights | Computer | Controls Software

Studio

Professional setups with integrated studio management tools. Photographers or stylists (full or part-time) are responsible for visual quality, while operators process the volume. Designed for hundreds to thousands of items to be photographed in a row.

Typical job: **Batch shooting**

Prior to the shooting, items that are the same or similar (size, transparency, reflection) are grouped into batches to **minimize setup times**. The production process is standardized and distributed across multiple machines/workspaces. Supports product reception, weighing, measuring, automated publishing, QC and reporting.

Delivery, installation and staff training worldwide! Trusted customer support. High-level security.

Recommended setup:

[Cube](#) | [Centreless Table](#) | [Turntable](#) | [Multicam](#) | [Robotic Arm](#) | [Carousel](#) | [Turning Platform](#) | [Catwalk](#) | [Frame](#)

Recommended equipment:

PhotoRobot | One or more cameras | Lights | Computer | Controls Software

Corporation

Complex setups for mass photo production - combining standard and custom tools - engineered to perform with existing systems of the client. Designed for product portfolios with hundreds to thousands of items.

Typical job: **Bulk shooting**

Location-independent, multi-studio solutions for mass shooting - in which each machine is configured for a specific range of products. Diversity of product groups is covered by multiple workspaces to **reach zero downtimes**. No matter where or when the product has been photographed - the entire project is delivered on the fly from a single source.

Detailed project. Fast delivery, installation and staff training worldwide! Ongoing training and support services. Corporate-grade security.
