GET the best setup for you

Let us know what kind of setup you have in mind, and we will help you choose the best solution for your specific needs

[BUILD ME A SET-UP](#)

We are here for you!

As a result of our (free) consulting services, you will receive a structured document covering the basic pillars of the entire solution, key benefits and technical details of your bespoke solution. Of course, you will see the imagery production process live - in person or remotely - to be sure you invest the right way.

FREELANCER

Minimalistic and efficient setups (stationary or portable) suited for freelancers and small businesses in need of in-house yet professional photo shootings results, where tens to hundreds of items to be photographed in a row.

[BUILD ME A SET-UP](#)

Typical job: **Automated shooting**

Affordable solutions, open to your creative ideas, that don't compromise the professional qualities of your results.

Efficient thanks to easy setup, automatic capturing, background removal and image processing, real-time backup and imagery export. Easy to repeat the previous (or similar) job with presets that include all settings for shooting and image-processing .

Fast delivery worldwide! You can choose self-installation and remote training (selected models) - or rely on the experienced PhotoRobot team.

Recommended setup:

[Case](#) | [Cube](#) | [Turntable](#) | [Centreless Table](#)

Recommended equipment:

PhotoRobot | Camera | Tripod | Lights | Computer | Controls Software

STUDIO

Professional setups with integrated studio management tools. Photographers or stylists (full or part-time) are responsible for visual quality, while operators process the volume. Designed for hundreds to thousands of items to be photographed in a row.

[BUILD ME A SET-UP](#)

Typical job: **Batch shooting**

Prior to the shooting are same-or-similar items (size, transparency, reflection) grouped in batches, to **minimize setup times**. The production process is standardized and spread across multiple machines/workspaces. Supports product reception, weighing, measuring, automated

publishing, QC and reporting.

Delivery, installation and staff training worldwide! Trusted customer support. High-level security.

Recommended setup:

[Cube](#) | [Centreless Table](#) | [Turntable](#) | [Multicam](#) | [Robotic Arm](#) | [Carousel](#) | [Turning Platform](#) | [Catwalk](#) | Frame

Recommended equipment:

PhotoRobot | One or more cameras | Lights | Computer | Controls Software

CORPORATION

Complex setups for a mass-photo-production - combining standard and custom tools - engineered to perform with existing systems of the client. Designed for product portfolios hundreds of thousands of items wide.

Typical job: **Bulk shooting**

Location-independent, multi-studio solutions for mass shooting - where each machine is configured for a specific range of products. Diversity of products groups is covered by multiple workspaces to **reach zero downtimes**. No matter where or when the product has been photographed - the entire project is delivered on the fly from a single source.

Detailed project. Fast delivery, installation and staff training worldwide! Ongoing training and support services. Corporate-grade security.

Recommended setup:

[Cube](#) | [Centreless Table](#) | [Turntable](#) | [Multicam](#) | [Robotic Arm](#) | [Turning Platform](#) | [Catwalk](#) | [Carousel 5000](#)

Recommended equipment:

PhotoRobots | One or multiple cameras | Lights | Computers | Controls Software
