

# CATWALK

Virtual fashion show

## PRESENTATION IN MOTION

A professional-looking fashion show can be created quickly and effectively in a very small space and with just standard studio lighting. The \_Virtual **Catwalk** has the model walk on a moving belt while the platform rotates. The camera stays in place, resulting in a video with a flying camera effect. In addition, the workstation is suited to common 360° photography of both live models or objects when the belt is not running.

## online fashion show

A fashion show is a singular event which turns pieces of clothing into fashion. A professional fashion show can be made a reality even in the world of online presentation, by using a surprisingly simple piece of equipment in the form of \_VIRTUAL **CATWALK**. An impressive video only needs to last a few minutes, and a fashion show with dozens of models can be made within a single day.

## CATWALK

### Customize

The belt speed and turntable rotation can be adjusted so that they suit the model perfectly.

### Easy Entry & Exit

The wide plate is secured with supports which allow easy entry to & exit from the platform.

### No need to move

Everything in the studio can remain in its place.

### Adjustable Level

The Catwalk can be recessed into the floor to make the working area level with it.
