

Digital Asset Management

Organize and share your images

Unlimited secure storage

Unlimited and Reliable storage for ALL your images.

Multi-regional deployment with disaster recovery. All data stored in ISO 27001 secure Google cloud platform and accessed by TLS-encrypted connections only. Regular audits performed to maintain the best possible security in the industry.

Disaster Recovery

Our Multi-Regional Storage is geo-redundant, which means Cloud Storage stores your data redundantly in at least two geographic places separated by at least 100 miles within the multi-regional location of the bucket. Geo-redundancy occurs asynchronously, but Multi-Regional Storage data is redundant within at least one geographic place as soon as you upload it. Like all Cloud Storage data, it is also immediately accessible worldwide.

Organize

Organize your assets into projects, items and folders. Multiple types of assets are supported like static Images, Galleries, Spin or 3D photos. JPEG, PNG, WebP, TIFF and RAW files are supported.

Fulltext Search

You can search in projects, items, clients, or users. Conditional search queries available for items.

Categorization

You can categorize your data through tagging. Tags are searchable in fulltext or by a simple click on the tag itself.

Bulk operations

Perform actions on multiple items at once.

Collaboration

Collaborate freely and Effectively

Collaborators can communicate by using comments on each item. This helps to speed up the approval process.

Approval Process

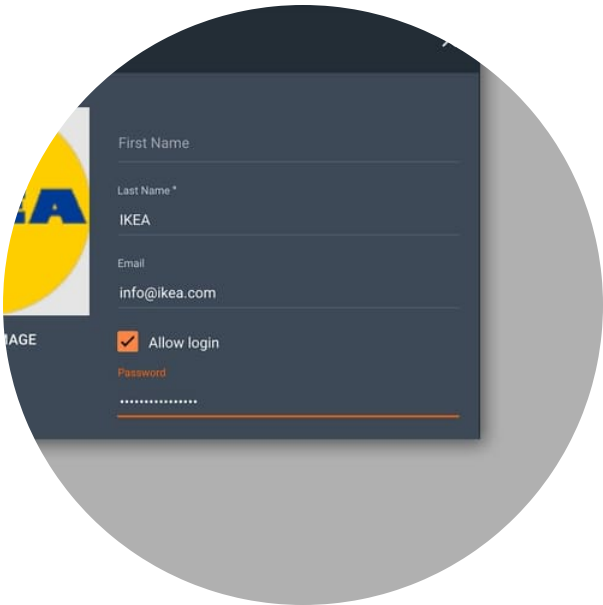

The approval process is integrated and handled directly in the application. Internal or external ' your choice. A client with login permissions can do the Approval externally ' Managers or quality control staff can Approve items internally

Client Page

Each client has their own personal page. Quick overview of projects and items available.

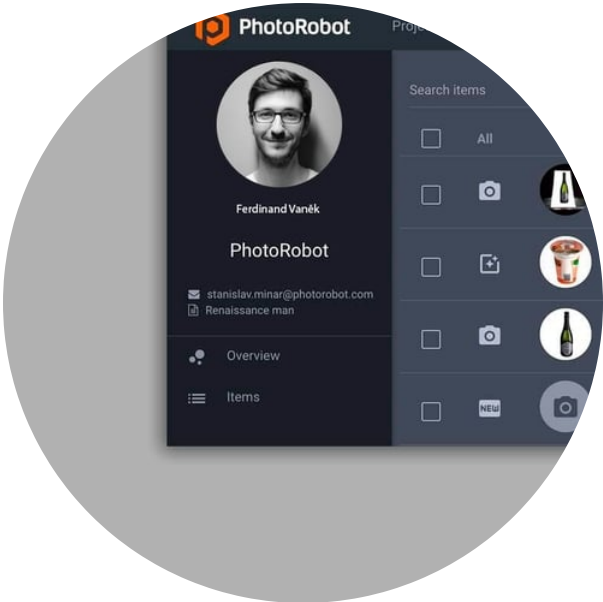

Grant Access to Your Clients

It's possible to grant access to the assets to your clients. Just a few clicks are needed. Check "Allow Login" ' Enter the "Password". That's all.

Photographer page

Each photographer/account also has their own page. Quick overview of projects and items available.

iMPORT

You can import any kind of data by using the CSV import tool.

Integration

Integrate with your e-commerce using export feeds. JSON and XML formats are available on the level of project, organization or client. All items are available in a computer-readable format. Various properties are included, such as: Name, ID, SKU, Status, Timestamp

GDrive Export

Export your assets to Google Drive in a specified resolution, format and filename. Then use GDrive agent to sync your files locally.
