

Spinviewer

Tune your spins in real time. Fast, safe and intuitive. FREE of charge.

--- SpinViewer Configuration ---

FEATURES

Unlimited view count and data transfer. No additional expenses. You are billed only according to the data storage used.

Customisable

Customise your animation with multiple parameters. Just find your style.

With no limits

Unlimited view count and data transfer. No additional expenses. You're billed only for the data storage.

Digital asset management

All your images perfectly organized, searchable and secure thanks to our Digital Asset Management system.

JPEG Compression

Gain a better loading speed with configurable JPEG compression level. Real-time = no need to create file duplicates.

Automatic Publishing

If you're using the PhotoRobot Cloud platform also for capturing images, no file transfer is needed. All images are ready to be hosted just after capture.

Integration

Integrate with your e-commerce using export feeds. JSON and XML formats are available. On the project, organisation or client level.

Global Image CDN

Special image CDN (Content Delivery Network) provided by Google Cloud Platform with a real-time scaling capability. Every picture is scaled-down in real-time to pixel perfect resolution for the end-user device.
