SOFTWARE DEVELOPER - COMPARAENCASA - ARGENTINA REMOTE - JUNE 2022 - PRESENT

My responsibility is to consume external APIs from insurance companies and create serverless functions for internal consume. I'm in contact with technical teams of the insurance companies, working mostly with companies from Brasil.

- Create and maintain web services using serverless.
- Consume of APIs. REST, SOAP, and GraphQL.
- Create unit tests.
- Code review.

ABOUT ME

I'm a full stack developer with 2 years of commercial experience. I have been focusing on Python with the Django Framework.

I am eager to join to an international team, and work in a friendly, flexible and professional environment.

I always enjoy new challenges, explore new technologies and share my point of view.

I consider myself a very proactive person and I'm always learning from new experiences.

I have the capability to adapt very fast to new technologies, process and environments.

SOFTWARE DEVELOPER - FREELANCE - MAY 2022 - PRESENT

I provide support to my former company which includes bug resolution, advising on technologies to use, and creating new applications.

- Build custom apps based on client requirements using the Django framework.
- Give advice on what path a project should take.
- Fix bugs.

TECHNOLOGIES

- Python
- Django
- HTMX/Hyperscript
- Javascript
- NextJS
- Docker / Docker compose
- PostgreSQL
- Serverless

PYTHON/DJANGO DEVELOPER - HLX STUDIOS - USA REMOTE - DECEMBER 2020 - MAY 2022

My main responsibility was to create, maintain and refactor +4 Django sites built from start to finish.

After creating a Django site I was responsible for the proper functioning, monitoring and bug resolution, and design and development of new applications.

- Create and maintain medium to large Django sites.
- Use of Django messages, signals, CBV, consume external APIs, integration with HTMX, integration with Celery and Celery Beat.
- Use of Javascript to create UI elements.
- Create and maintain small to medium Odoo apps.
- Create and maintain ViolentMonkey scripts.
- Create API endpoints with FastAPI.
- Create and maintain stored procedures on PostgreSQL.
- Use of Docker and Docker Compose in development and production environments.

LANGUAGES

- Spanish Native
- English Intermediate-upper
