

STATE OF MINNESOTA**DISTRICT COURT****COUNTY OF HENNEPIN****FOURTH JUDICIAL DISTRICT**

State of Minnesota,

Court File No.: 27-CR-23-1886

Plaintiff,

vs.

DEFENDANT'S

Matthew David Guertin,

AFFIDAVIT OF FACT

Defendant.

TO: THE HONORABLE JULIA DAYTON KLEIN, JUDGE OF THE DISTRICT COURT; THE CLERK OF THE FOURTH JUDICIAL DISTRICT COURT; MS. JACQUELINE PEREZ, ASSISTANT HENNEPIN COUNTY ATTORNEY; AND THE OFFICE OF THE HENNEPIN COUNTY ATTORNEY.

AFFIDAVIT OF FACT

I, MATTHEW DAVID GUERTIN, residing at 1075 Traditions Court, City of Chaska, County of Carver, State of Minnesota, being duly sworn, hereby depose and state under penalty of perjury:

INTRODUCTION

This Affidavit of Fact contains images which were obtained solely from my cell phone. Meaning that they are a mixture of camera images, screen captures, and pretty much anything that randomly got turned into an image through one way or another, and then saved to my phone at the specific time and date that is included above each image – meaning that all of the dates and times listed for each image included is in fact the date and time as indicated in the metadata / image properties of the image itself. I feel it is important and highly relevant to my current legal proceedings taking place within the Hennepin County Court to share these images due to the sequential timeline format of the images, which provide a very detailed look at my life and personal activities both prior to the incident on January 21, 2023 resulting in my current criminal charges, and also what my activities, and undertakings were following the incident on January

21, 2023. I am of the belief that these images paint a very clear picture of my rather ambitious, and technical, yet still rather ‘normal’ life and business related activities. These timeline images essentially serve to ‘tell a story’ – one which I am of the opinion, has been completely skewed by those involved in certain aspects of my court matters, in what I believe is an intentionally deceptive portrayal of who I am as a person, as well as the vast technical undertaking surrounding my business endeavors that I have been working on, which all relate directly to my patent, US 11,577,177.

EXHIBIT SUMMARY

Exhibit A:

An ‘image timeline’ that I created to provide a very clear presentation of my activities

CONCLUSION

I affirm under penalty of perjury that the foregoing is true and correct to the best of my knowledge, information, and belief.

DATED this 6th day of May, 2024.

Date: May 6, 2024

Respectfully submitted,

By: /s/ Matthew Guertin

[illegible]

Group 1: Basic shapes and their transformations

Some additional popular shapes describe both circles and squares. I think this is pretty cool except for the fact that the square's center is off from seeing a little better. Perhaps if they were a little bit bigger and not so tight, it would reflect on a giant ball of the same time (I am aware of this, I am not).

Maybe someone saw the something that should be on top of a church. The business and hard edges make it look more like a circle than a square. I think I have a better technical adjustment.

Current notion of spheres there is only one circle in a little bit larger and different from the rest of the ball and the circle in the direction the user would be looking (nothing wrong, etc).

Group 2: Knots and links

Perhaps the infinity symbol could be rotated 90 degrees so it stands up vertically and rotating it 180 degrees.

Group 3: Complex shapes and their transformations

My company is going to produce different versions and sizes of my rotating treadmill. No matter how large I become (picture a version of a big film studio that is large enough to show a whole group of people with a giant ball at the same time) it is always going to be the same circle shape, rotated 180 degrees, and have a rectangular shaped treadmill ball that is centered within the circle. So that simple circle and rectangle will remain accurate and relevant.

Group 4: More complex shapes and their transformations

My company is going to produce different versions and sizes of my rotating treadmill. No matter how large I become (picture a version of a big film studio that is large enough to show a whole group of people with a giant ball at the same time) it is always going to be the same circle shape, rotated 180 degrees, and have a rectangular shaped treadmill ball that is centered within the circle. So that simple circle and rectangle will remain accurate and relevant.

[illegible]

- Some additional profile shape concepts that make use of arrows
- Yesterday I didn't really care about them after being talking and re-opening I like a lot
- It feels a little harsh - just... abstract for some reason
- unless business is an arrow itself, could be one of that feeling
- maybe a little more like a 'y' - similar to the 'y' - maybe less angular, maybe it fits
- maybe less arrow points itself - arrows create a circle / box - could use 3, 2, 1... or none
- the arrows could maybe be longer and become arrow 'quits' - similar to the 'y' and it's a bit more
- I know this to be one of my graphic designer, 3d animation friends and he replied by simply sending me back an updated image of #7 above as what he liked out of everything.

- I feel like the main point icon is a universally understood symbol at this point.
- Is there an outline of a person used as #7? Maybe person is represented as a map point icon instead?
- My feeling is #7 - the other ones I like are ones which include some sort of travel path/concept which implies movement between different locations as opposed to a single, static location on a map

- Including some form of a film camera in my branding would be cool but it is second to last in terms of what I consider to be important
- If there is a word include a film camera I would want it to be as simple as possible which is reflected in the 3 favorites I submitted above

- Including infinity symbol in my design would be the lowest priority out of all of the points / items I like I am presenting here
- I believe the 'infinite' name I came up with is perfect because it is describing exactly what my new business is - it's capturing the essence of a business that can grow and evolve where the person being filmed is no longer confined to a small area in terms of their ability to watch/over through the lens of the camera - they are filmed over
- The word 'infinite' or 'infinity' clearly being a part of my companies name actually equate to the infinity symbol - to be included somehow in the logo/branding/identity - I don't feel like the infinity symbol is dead and boring - I can use it over these days - I think I want it to be a symbol that is not overused, not overused, not overused - at least not in the same way a new and completely different logo would convey it

- If it were to be included in my new logo design I would want it to be in a way where it is hidden or presented as a sort of very minimal and perhaps abstract way - negates the one thing the infinity symbol is NOT in presentation - picture it being used as an amount of sets
- As for as my personal style preferences I prefer the asymmetrical representations of the infinity symbol - 1, 2, 3, and really like it even though something as bold as that isn't exactly elegant and could be an entire logo itself without those additional word or effect
- Like a solid #9 that would be envision those round dots instead being a much thinner dashed line that is representing a frame

Style Simple Sales

Infinity symbol could be included by rotating it 90 degrees so it stands up vertically and treating it as the letter 'S'

TRACK ONE U.S. Non-Provisional Patent
Application
Assignee: INFINISET, INC.
Serial No.: 17/698,420
Filed: March 18, 2022
For: Motorized rotatable treadmill and system
for creating the illusion of movement
Our File: G185.0001US1

Dear Matt:

Please find attached a copy of the Issue Fee
and Comments as filed with the USPTO in the
above-identified application on January 9,
2023.

Also attached is a copy of the recent
Information Disclosure Statement initiated by
the Examiner along with the Supplemental
Notice of Allowability showing the Examiner
has examined all of the art we submitted in
this application.

January 14th, 2023 4:02pm CST

Thanks for the update. This does make more
sense.

Unfortunately I'm not surprised at the FBI
reaction, but I do think emailing the patent
attorney for the Netflix application was an
interesting move. Let them see they have a
prior art issue unless they agree it's faked art
and see how they handle it.

January 19th, 2023 4:57am CST

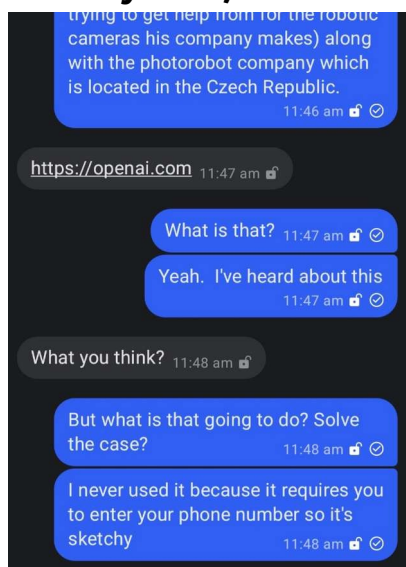

Here - if you have a trusted contact at
FBI or wherever that will look into this
and considers it a serious matter just
send them this as the introduction -

https://www.dropbox.com/s/8qirc4nec0bo71a/Data_Analysis_Fraud.zip?dl=1

I have all supporting documents/
files as well along with a massive
cache of additional data 11:43 am

It involves someone at the internet
archive conspiring with the ceo of a
company in the UK named Assaff
Rawner (who I believe is the
mastermind behind the whole thing
as that is who I emailed and was
trying to get help from for the robotic
cameras his company makes) along
with the photorobot company which
is located in the Czech Republic. 11:46 am

Property Status: Narrative (1)

MAIN REPORT: BHARRIS, 166
HARRIS, BRANDON 62166 01/12/2023

On 01/12/2023 I responded to the Minnetonka Police Department lobby for a report of fraud. I made contact with reporting party MATTHEW DAVID GUERTIN DOB 07/17/1981 in the department lobby.

GUERTIN STATEMENT:

- He has filed for and acquired a patent for his invention, "Motorized Rotatable Treadmill and System for Creating the Illusion of Movement."
- The machine is used for filming cinema.
- He pitched the patent to Mark Roberts Motion Control (mrmoco.com).
- The CEO, Mark Roberts, advised that the technology already existed and is used by Photo Robot (photorobot.com).
- He looked at the Photo Robot website and observed the technology used to be similar but different from his.
- While reviewing the website over a number of days he realized the website was changing to reflect his patent.
- The website is being updated in real time with information from his design.

Printed On 02/06/2023 Page 2 of 3 Printed By THOMAS, MARY

February 6th, 2023 8:18pm CST

Minnetonka Blvd Minnetonka, MN 55345
5510

MP23000151 Incident #: MP23000151

- Photo Robot is effectively stealing his patent by making it look like they have already had the technology.
- He has proof of the fraud.
- He has been downloading the website and has noticed a number of discrepancies between the current version and the old version of the website.
- He believes the master mind behind all of this is Mark Roberts who he initially discussed the patent with.
- He believes that he could sell the patent to Netflix for 100 Million dollars.
- He originally called the FBI who advised he needed to file a report with his local police agency.
- He understands there is nothing the local police can do.

OFFICER OBSERVATIONS ACTIONS:

- Guertin advised that he has many gigabytes of evidence to show the fraud.
- I advised Guertin to connect with a computer forensicator in order to parse the data into a readable format.
- I agreed with Guertin that this issue is beyond the scope of the local police department.
- I advised Guertin to provide the FBI with the case number and the parsed data when he files the report with them.

DISPOSITION:

- Information Report.

Hi Matt,

Attached is a receipt for the confirmation of the third party submission of your patent, US 11,577,177 as relevant to the claims of the Trojansky/Netflix application, Serial No. 17/709,126. We have also asked to be notified when the submission is reviewed and entered.

The submission will populate in the record for the pending application in a few hours and at that time, we can save a copy of the actual submission itself for your records.

Have a great weekend!

Best regards,

Amanda

right to participate as a party in any proceedings concerning proposed changes in the defendant's civil commitment or status.

Subd. 8. Dismissal of Criminal Charge.

(1) Felonies. Except when the defendant is charged with murder, the criminal charges must be dismissed three years after the date of finding the defendant incompetent to proceed unless the prosecutor, before the expiration of the three-year period, files a written notice of intent to prosecute when the defendant regains competency.

(2) Gross Misdemeanors. The criminal charges must be dismissed 30 days after the date of finding the defendant incompetent to proceed unless before that date the prosecutor files a written notice of intent to prosecute when the defendant regains competency. If a notice has been filed, the charges must be dismissed when the defendant would be entitled under these rules to custody credit of at least one year if convicted.

April 23rd, 2023 7:36pm CST

April 23rd, 2023 7:32pm CST

remarks often impressed as grandiose in nature. For instance, he spoke of being "an engineer," describing a recent technological invention in glowing terms and characterizing it as somewhat revolutionary.

Mr. Guertin espoused perceptual disturbances consistent with delusions (i.e., fixed beliefs that deviate markedly from objective reality and are held despite contradictory evidence). He spoke at length about his prowess with technology, including an invention he patented related to visual effects and photography technology. While some elements of his assertions referenced real technological subjects (e.g., neural radiance fields¹), the defendant's views in relation to these matters were also consistent with the phenomenology of delusions. In particular, he asserted that large corporations (e.g., Netflix and Microsoft) discovered this technology, realized the financial incentives at stake, and began to target the defendant for nefarious purposes. For instance, he expressed views that these agencies accessed his patented technology through his personal devices, fraudulently implemented it as if created by them, and went to great lengths to cover up the theft. Mr. Guertin further insisted the entities in question intended to harm or kill him, referring to the situation as a "conspiracy" "at a bigger level" in which he perceived his "safety to be at risk," citing "weird coincidences" (e.g., the presence of "two cars behind [him]" at one time²) to support his conclusions. His remarks and reasoning in these domains referenced unclear, irrational reasoning and implausible events. On this point, the defendant produced a large volume of documentation, which was reviewed for this examination, that he stated supported his conclusions. However, the links between some of these data and his inferences were not clear. Rather, they showed that his patent had the potential to be lucrative if it was as innovative as others he used as examples. The documentation he identified as most critical³ did not support his assertions, instead suggesting Mr. Guertin was prone to inferring nefarious intent from benign stimuli.

Designed in sketch form by Virkhaus, with notch programming by XiteLabs' Tanner Thompson, and Resolume operation by Ivan Ceron, the set piece was engineered and built in-house at XiteLabs studio by creative technologist Matt Guertin. LED tiles from PRG were dismantled into smaller component modules, custom configured and re-wired by Guertin at XiteLabs to create smaller radius circular elements to create the smooth edges of the eye. Guertin designed and engineered 420 metal parts cut out of eight different types of material, as well as 268 individual acrylic pieces from six different materials. The estimated total number of soldering points was in the 2,000 range.

"A couple things on Bad Bunny were new and interesting" points out Virkhaus referring to their use of PRG and Resolume software to create the eye.
