For more than a decade, computer vision researcher Paul Debevec has been developing technologies to digitize humans. These techniques have been used in a variety of fields including visual effects on Hollywood's biggest blockbusters. Join him on a tour of the Graphics Lab and USC's Institute for Creative Technologies. Sit inside the Light Stage and experience a facial scan.

Funny Cat Videos Motive

Here at [Funny Cat Videos](#), we take funny cat videos seriously, so when it came time for us to determine what videos would do a lazy day justice, we had some pretty stringent parameters. Our picks needed to have insanely good replay value. They needed to have relatable characters and stories easy enough to invest in that even someone hunkered-down with the flu could still enjoy what's going on. And lastly, longer cat movies, Cute Cats, Funny cats, Funniest Cats Compilation and funny animal videos took priority in our research, for obvious reasons (read: time consumption).
