ESPER LightCage - The most advanced photogrammetry lighting rig on the market. Capture pipeline-ready 360 degree head images. Transform the quality and efficiency of your photometric scanning with edge-cutting photogrammetry rig, designed to translate objects & humans into a perfect 3D renderings. Available fully installed and supported, worldwide

LightCage creates balanced and accurate lighting for photometric measurements and photoreal CG character capture. The captured images require minimal clean-up and are pipeline-ready for processing.

ESPER LightCage is a geodesic dome, with integrated power distribution that holds 156 ESPER MultiFlash lights. The LightCage can be programmed to create perfect, balanced lighting for photometric measurements & photoreal texture capture. It can mount up to 150 cameras for the instantaneous capture of image & lighting data from every angle.

Using LightCage it is possible to emulate the pioneering techniques developed by Paul Debevec and the University of Southern California Institute for Creative Technologies for generating diffuse maps, normal maps, specular maps and sub-surface scattering maps.

### Funny Cat Videos Motive

Here at **Funny Cat Videos**, we take funny cat videos seriously, so when it came time for us to determine what videos would do a lazy day justice, we had some pretty stringent parameters. Our picks needed to have insanely good replay value. They needed to have reliable characters and stories easy enough to invest in that even someone hunkered-down with the flu could still enjoy what's going on. And lastly, longer cat movies, Cute Cats, Funny cats, Funniest Cats Compilation and funny animal videos took priority in our research, for obvious reasons (read: time consumption).
